PROFESSIONAL EXPERIENCE

Superhuman | Software Engineer | San Francisco, CA   5/2022 - 10/2023
- Worked with a small team to deliver a new live chat help experience.
- Created actionable data by A/B testing new homepage designs and price points.
- Improved SEO and page load by implementing image optimization standards for our website.

Formation | Senior Software Engineer | San Francisco, CA   10/2021 - 4/2022
- Collaborated with product and backend teams to turn requirements into working features.
- Worked across the full stack - SQL migrations, GraphQL resolvers, and UI updates - to deliver features.
- Drove UI architecture decisions around performance, dev tools, code quality, testing, and best practices.
- Led bi-weekly UI team meetings, participated in code review, and mentored engineers.

Rally Health | Software Engineer | San Francisco, CA   03/2021 - 10/2021
- Improved page load time by upgrading legacy Angular application to React.
- Gave the application a modern feel by implementing a new design system.
- Improved product reliability by writing unit and end-to-end tests.
- Reduced team's cycle time by configuring a local proxy to higher environments.
- Reduced training time for new hires by creating a Wiki page for the team.

Consultant | Software Engineer | San Francisco, CA   12/2019 - 03/2021
- Worked directly with startups and small businesses to deliver software solutions.
  Created custom search and quote widgets for southwinds rentals with JavaScript and a REST API.
- Created modular components with Next.js and TailwindCSS and configured Gmail and Mailchimp APIs for whossavingtheplanet.com.
- Instructed a course on creating a tesla paint picker with Threejs and react-three-fiber.

Canon BPS & The Millennium Group @ Facebook | Project Manager | Menlo Park, CA   2/2017 - 12/2019
- Reduced time spent on FAQ-related tickets by updating and organizing client-specific web page frontend.
- Increased ticket-handling capacity and enabled better reporting and resource distribution by designing and automating ticket lifecycle and data collection.
- Collaborated with Engineers to create a queueing tool and integrate with a data collection framework.

PROJECT WORK

World Code Camp | Founder & Full-Stack Engineer | live

A platform for learning web development.
- Created an SEO-optimized website with Next.js, TailwindCss, and markdown support.
- Deployed and maintains a Hasura backend with Heroku Docker and Postgres.
