SKILLS

TypeScript, JavaScript, Next.js, React, HTML, CSS, SEO, TailwindCSS, Node.js, GraphQL, THREE.js, AWS, Google Cloud, Heroku, Linux, Docker, SQL, REST, Mocha, Jest, Git, Kubernetes, Puppeteer, Playwright

PROFESSIONAL EXPERIENCE

[Franklie.ai](#) | **Cofounder & Lead Engineer** | San Jose, CA (Remote)

10/2023 - 6/2025

- Implemented queue-based email processing architecture with AWS SQS and Lambda
- Categorized past purchases using LLMs, Gmail API, AWS, Postgres, Python, GraphQL and React.
- Accelerated development and improved quality by creating testing environments and CI/CD for all services using AWS SAM and Github Actions.
- Failed to find product-market-fit.

[PayPal](#) | **Full-Stack Software Engineer** | San Jose, CA (Hybrid | Contract)

12/2024 - 4/2025

- Updates customer-facing front-end and servers using TypeScript, Node, and React.
- Manages production deployments for multiple services.
- Contract ended.

[Superhuman](#) | **Software Engineer** | San Francisco, CA (Remote)

5/2022 - 10/2023

- Delivered “multiple calendars” features for Outlook and Gmail using TypeScript and React.
- A/B tested features on superhuman.com using JavaScript and LaunchDarkly.
- Improved SEO and page load for superhuman.com with image optimization scripts written in Bash.
- Gave insight into critical checkout errors by implementing E2E tests with Playwright.

[Formation.ai](#) | **Senior Software Engineer** | San Francisco, CA (Remote)

10/2021 - 4/2022

- Significantly reduced web application bundle size by auditing and pruning npm/yarn dependencies.
- Reduced development time and improved quality by installing TailwindCSS and React Testing Library.
- Worked across the full stack - SQL migrations, GraphQL resolvers, and UI updates - to deliver features.
- Left because of poor team structure and management.

[Rally Health](#) | **Software Engineer** | San Francisco, CA (Remote)

03/2021 - 10/2021

- Reduced team’s cycle time by configuring a local proxy to higher environments using Node.js and Bash.
- Upgraded legacy Angular application to React.
- Improved product reliability by writing unit and end-to-end tests with WebdriverIO.
- Wish I had stayed here! Left in hopes of furthering my career.

Consultant | **Software Engineer** | San Francisco, CA (Remote)

12/2019 - 03/2021

- [Southwinds Rentals](#): Created custom search and quote widgets with JavaScript, PHP, and a REST API.
 - [whossavingtheplanet.com](#): Built company website with Next.js, React, and TailwindCSS and configured Gmail and Mailchimp APIs for newsletter signup.
 - Instructed a [Three.js using React](#) a course on Udemy.
-

PROJECT WORK

[Jobhunt](#)

- Next.js, React, TailwindCSS, and React-Query frontend deployed on Vercel.
 - Hasura GraphQL engine with Postgres database deployed on Nhost.
 - Includes automatic TypeScript type generation for any backend changes.
-

EDUCATION

Software Engineering, *App Academy*, 2019-2020

Mathematics, *De Anza College*, 2011-2014
