SKILLS

TypeScript, JavaScript, Next.js, React, HTML, CSS, SEO, TailwindCSS, Node.js, GraphQL, THREE.js, AWS, Google Cloud, Heroku, Linux, Docker, SQL, REST, Mocha, Jest, Git, Kubernetes, Puppeteer

PROFESSIONAL EXPERIENCE

[Superhuman](#) | Software Engineer | San Francisco, CA (Remote)

5/2022 - 10/2023

- Implemented homepage A/B test and pricing experiment.
- Wrote a large portion of code and tests for the new free experience for all new users.
- Delivered “multiple calendars” features for Outlook and Gmail.
- Improved SEO and page load of the website with image optimization scripts.

Formation.ai | Senior Software Engineer | San Francisco, CA (Remote)

10/2021 - 4/2022

- Significantly reduced web application bundle size by auditing and pruning dependencies.
- Configured TailwindCSS and React Testing Library.
- Worked across the full stack - SQL migrations, GraphQL resolvers, and UI updates - to deliver features.
- Led bi-weekly UI team meetings, participated in code review, and mentored engineers.

[Rally Health](#) | Software Engineer | San Francisco, CA (Remote)

03/2021 - 10/2021

- Improved page load time by upgrading legacy Angular application to React.
- Gave the application a modern feel by implementing a new design system.
- Improved product reliability by writing unit and end-to-end tests.
- Reduced team’s cycle time by configuring a local proxy to higher environments.
- Reduced training time for new hires by creating a Wiki page for the team.

Consultant | Software Engineer | San Francisco, CA (Remote)

12/2019 - 03/2021

- [Southwinds Rentals](#): Created custom search and quote widgets with JavaScript and a REST API.
- [whossavingtheplanet.com](#): Built company website with Next.js, React, and TailwindCSS and configured Gmail and Mailchimp APIs for newsletter signup.
- Instructed a [Three.js using React](#) a course on Udemy.

Canon BPS & The Millennium Group @ Facebook | Project Manager | Menlo Park, CA

2/2017 - 12/2019

- Reduced time spent on FAQ-related tickets by updating and organizing client-specific web page frontend.
- Increased ticket-handling capacity and enabled better reporting and resource distribution by designing and automating ticket lifecycle and data collection.
- Collaborated with Engineers to create a queueing tool and integrate with a data collection framework.

PROJECT WORK

[Fullstack CRUD Template](#) | [github](#)

- Next.js, React, TailwindCSS, MaterialUI, and Apollo frontend deployed on Vercel. Uses Clerk.com for auth.
- Hasura GraphQL engine with Postgres database deployed on Hasura Cloud.
- Includes automatic TypeScript type generation for any backend changes.
