### PROFESSIONAL EXPERIENCE

#### Consultant | Software Engineer | San Jose, CA (Remote)

10/2023 - Present

- **[Franklie.ai](#) | Full-Stack Software Engineer | San Jose, CA (Remote | Contract)**
  - Reduced costs by 8X by removing unused AWS services and improving performance.
  - Used Gmail API to scrape receipts, parse detailed product info with OpenAI, and save to profile using Python backend and SQL database. Built queue infra with AWS SQS & Lambda in TypeScript.
  - Developed seamless CI/CD for all services using AWS SAM, and Github Actions.
  - Developed UI features with TypeScript and React, delivering a robust MVP with 100+ users in less than 6 months.
- **[PayPal](#) | Full-Stack Software Engineer | San Jose, CA (Hybrid | Contract)**
  - Helped enable passkey for PayPal login, reducing friction and enhancing security for over 40 million transactions per day.
  - Worked across team boundaries to deliver vital data from login screens to legal compliance and transaction processing teams.

#### [Superhuman](#) | Software Engineer | San Francisco, CA (Remote)

5/2022 - 10/2023

- Worked with [Gaurav Vohra](#) to deliver a free tier for paying teams, increasing team growth by a viral 400%.
- Reduced marketing website LCP from 3s to 2.1s with image optimization scripts written in Bash
- Worked with product, design, and 2 other engineers to allow users to add multiple calendars using Outlook and Gmail APIs, TypeScript, and React.

#### [Formation.ai](#) | Senior Software Engineer | San Francisco, CA (Remote)

10/2021 - 4/2022

- Audited and pruned dependencies, reducing bundle size by ~50% from 3MB to 1.7MB.
- Reduced development time and improved quality by configuring TailwindCSS and React Testing Library.
- Worked across the full stack - backend SQL migrations, Golang GraphQL resolvers, and TypeScript / React UI updates - to deliver dynamic, targeted marketing campaign features.

#### [Rally Health](#) | Software Engineer | San Francisco, CA (Remote)

03/2021 - 10/2021

- Upgraded legacy UI from Angular application to React with full test coverage using Jest and WebdriverIO.
- Configured a local proxy to higher backend environments using Node.js and Bash, reducing cycle time by 10%.

#### Consultant | Software Engineer | San Francisco, CA (Remote)

12/2019 - 03/2021

- Instructed a [Three.js using React](#) a course on Udemy.
- [Southwinds Rentals](#): Created custom search/quote widget UI with JavaScript, PHP, and a REST API backend.
- [whossavingtheplanet.com](#): Enabled newsletter signup using Next.js, React, TailwindCSS, Node.JS, and Mailchimp API.

#### Consultant | Logistics Point of Contact - Facebook HQ | Menlo Park, CA

03/2017 - 11/2019

- Used HTML and CSS to update internal shipping service webpage UI, reducing time spent answering FAQs.
- Collaborated with software engineers to create a queueing tool for service kiosks, eliminating paper forms.
- Reduced errors by writing Standard Operating Procedures and training the entire staff.

#### Consultant | Math Tutor ([Mathnasium](#) Sunnyvale and others) | Sunnyvale, CA

08/2014 - 03/2017

- Created lesson plans, tests, and homework assignments for subjects ranging from arithmetic to precalculus.
- Lectured and provided homework assistance in group and one-on-one settings.

#### [Syncreon](#) | Logistics Team Lead | Santa Clara, CA

08/2011 - 11/2013

- Led Six Sigma project that saved space and time.
- Responsible for maintaining inbound SLA at client site ([Agilent Technologies](#)).

---

### EDUCATION

**Software Engineering**, App Academy, 2019-2020

De Anza College, 2011-2014 (Calculus, Physics - Mechanics w/Calculus, No degree)
