SKILLS

TypeScript, JavaScript, Next.js, React, HTML, CSS, SEO, TailwindCSS, Node.js, GraphQL, THREE.js, AWS, Google Cloud, Heroku, Linux, Docker, SQL, REST, Mocha, Jest, Git, Kubernetes, Puppeteer, Playwright

PROFESSIONAL EXPERIENCE

[Franklie.ai](#) | Cofounder & Lead Engineer | San Jose, CA (Remote)

10/2024 - 6/2025

- Used Gmail API to scrape receipts, parse detailed product info with OpenAI, and save to profile in PostgreSQL.
- Implemented scalable, queue-based AI processing architecture with AWS SQS & Lambda in TypeScript.
- Accelerated local development with docker-compose and serverless.
- Developed seamless CI/CD for all services using AWS SAM, and Github Actions.

[PayPal](#) | Full-Stack Software Engineer | San Jose, CA (Hybrid | Contract)

12/2024 - 4/2025

- Updated customer-facing front-end and servers using TypeScript, Node, and React.
- Managed production deployments for multiple services.

[Superhuman](#) | Software Engineer | San Francisco, CA (Remote)

5/2022 - 10/2023

- Allowed users to add multiple calendars using Outlook and Gmail APIs, TypeScript, and React.
- Delivered “reverse free trial” experience using NoSQL to track free-tier usage.
- A/B tested the homepage and pricing structure on superhuman.com using JavaScript and LaunchDarkly.
- Improved SEO and page load for superhuman.com with image optimization scripts written in Bash.
- Volunteered to implement E2E tests with Playwright to catch critical checkout errors.

[Formation.ai](#) | Senior Software Engineer | San Francisco, CA (Remote)

10/2021 - 4/2022

- Worked across the full stack - SQL migrations, Golang GraphQL resolvers, and TypeScript / React UI updates - to deliver dynamic, targeted marketing campaign features.
- Significantly reduced web application bundle size by auditing and pruning npm/yarn dependencies.
- Reduced development time and improved quality by installing TailwindCSS and React Testing Library.

[Rally Health](#) | Software Engineer | San Francisco, CA (Remote)

03/2021 - 10/2021

- Reduced team’s cycle time by configuring a local proxy to higher environments using Node.js and Bash.
- Upgraded legacy Angular application to React.
- Improved product reliability by writing unit and end-to-end tests with WebdriverIO.

Consultant | Software Engineer | San Francisco, CA (Remote)

12/2019 - 03/2021

- [Southwinds Rentals](#): Created custom search and quote widgets with JavaScript, PHP, and a REST API.
- [whossavingtheplanet.com](#): Built company website with Next.js, React, and TailwindCSS and configured Gmail and Mailchimp APIs for newsletter signup.
- Instructed a [Three.js using React](#) a course on Udemy.

Consultant | Logistics Point of Contact - Facebook HQ | Menlo Park, CA

03/2017 - 11/2019

- Used HTML and CSS to update internal shipping service webpage, reducing time spent answering FAQs.
- Improved throughput and resource management by automating ticket lifecycle and data collection.
- Collaborated with software engineers to create a queueing tool for service kiosks, eliminating paper forms.
- Reduced errors by writing Standard Operating Procedures and training the entire staff.

Consultant | Math Tutor ([Mathnasium](#) Sunnyvale and others) | Sunnyvale, CA

08/2014 - 03/2017

- Created lesson plans, tests, and homework assignments for subjects ranging from arithmetic to precalculus.
- Helped a student study for a college placement test, landing them in calculus.
- Lectured and provided homework assistance in group and one-on-one settings.
- Checked student grades daily and followed-up with students after tests to ensure desired results.

[Syncreon](#) | Logistics Team Lead | Santa Clara, CA

08/2011 - 11/2013

- Led Six Sigma project that saved space and time.
- Responsible for maintaining inbound SLA at client site ([Agilent Technologies](#)).

PROJECT WORK

Jobhunt

- Next.js, React, TailwindCSS, and React-Query frontend deployed on Vercel.
 - Hasura GraphQL engine with Postgres database deployed on Nhost.
 - Includes automatic TypeScript type generation for any backend changes.
-

EDUCATION

Software Engineering, *App Academy, 2019-2020*

De Anza College, 2011-2014 (Calculus, Physics - Mechanics w/Calculus, No degree)
